About Us

Located in the heart of South Campus in the Center for Health Sciences, the Louise M. Darling Biomedical Library (Biomed) may be difficult to find the first time, but it's worth the trip. The Library can be found opposite the Botanical Garden, in between the Factor and Dentistry buildings. With eight levels of stacks, Biomed is an ideal place to find a quiet nook to immerse yourself in. Some portions of the library are reserved for graduate students in the health sciences, but it is otherwise open to all.

What to Know...

1) This library provides subject guides to life sciences, medicine, dentistry, nursing, public health and history of the sciences.

2) Ability to schedule one-on-one meetings with research consultants and science librarians.

3) Study spaces like collaboration pods, group study rooms, classrooms and laptop lending.

4) Find Special Collections for Medicine and Sciences on the fourth floor of the Biomedical Library.

5) Access nearly 700,000 print volumes featuring subjects like health and life sciences, psychology, etc.
